

**INTERNAL RECONSTRUCTION PROBLEM (HOMEWORK EXERCISE #4)**

This exercise appears in the Campbell textbook (3<sup>rd</sup> ed.) as Exercise 8.6, on pp. 216-217, dealing with Indonesian.

Your answer should contain three elements:

- 1) internal reconstruction of an invariant form of the prefix in pre-Indonesian;
- 2) a set of labeled rules to derive the modern simple and prefixed forms;
- 3) a clear statement of any ordering of the rules that is necessary to achieve the right result.

Note that some of the symbols used in the data deviate from the IPA. The symbol “y” means a palatal glide (as in English) and the “c” and “j” symbols with carons or hačeks over them are voiceless and voiced palato-alveolar affricates (like English “ch” and “j”).
